christopher bek has produced a revolutionary physics theory and claims that this theory of one 2001 solves the greatest scientific problem of all time by uniting relativity theory 1905 with quantum theory 1925 according to bek it proves that the universe is bounded at light speed and planck s constant that there is only one photon i e a being of light that one photon is god and that reality is an illusion meaning the moon does not exist when no one is looking at it he says that physicists are ignoring the theory because it effectively pulls their pants down the theory is dead simple and can be explained in just a few minutes the theory of one brings the reader face to face with the stunning realization that the universe is bounded rather than unbounded as einstein and others have asserted the theory of one delivers the ocean it is the theory that spells the end of physics it is the monolith of 2001 a spacetime odyssey

a concise comprehensive overview of the m theory and its application in today s world by a renowned american philosopher ken wilber has long been hailed as one of the most important thinkers of our time but his work has seemed inaccessible to readers who lack a background in consciousness studies or evolutionary theory until now in a theory of everything wilber uses clear non technical language to present complex cutting edge theories that integrate the realms of body mind soul and spirit he then demonstrates how these theories and models can be applied to real world problems and incorporated into readers everyday lives wilber begins his study by presenting models like spiral dynamics a leading model of human evolution and his groundbreaking all level all quadrant model for integrating science and religion showing how they are being applied to politics medicine business education and the environment he also covers broader models explaining how they can integrate the various worldviews that have been developed around the world throughout the ages finally wilber proposes that readers take up an integral transformative practice such as meditation to help them apply and develop this integral vision in their personal daily lives a fascinating and easy to follow exploration of the m theory this book is another tour de force from one of america s most inventive minds

master s thesis from the year 2013 in the subject psychology work business organisation grade 2 3 technical university of munich language english abstract when going for grocery

shopping some consumers make up their minds about what to buy and write down shopping lists others just go into the supermarket and do not really think beforehand about the things they need although in both situations individuals engage in different ways of decision making on the purchase of groceries when coming home and putting things into the shelf they positively or negatively assess the things they bought whereas in some situations one gets a positive feeling because e g s he purchased all the products on the shopping list in another situation a consumer might end up being bored because s he just bought the groceries which are perceived as useful and did not listen to his her inner voice calling for more than just the fulfillment of utilitarian needs generally consumers can consciously do their purchases and decide for products after thinking on it or can consider a product s attributes and let their intuition decide in the interest of the consumer the question emerges how the consumer decides at best does a consumer receive greater satisfaction from consciously elaborating about the products s he is facing or is it better not to think consciously when facing product choices this question is differently assessed by different models on decision making whereas some authors ajzen 2011 bandura 1986 1997 deci ryan 1985 payne et al 1993 emphasize consciousness in decision making there is also a large number of proponents of unconscious thought dijksterhuis 2004 dijksterhuis et al 2005 2006a 2006b 2006c levine 1996 bargh 2002 and wilson et al 1993 dijksterhuis and nordgren 2006b p 96 argue for the superiority of unconscious decision making by mentioning that conscious thought is constrained by the low capacity of consciousness which results in sub optimal choices with regard to food products this general superiority of unconscious thought is highly questionable on the one hand consumers constrain themselves in taking into account only specific products which respect certain criteria as e g with diabetics and food products with less sugar content on the other hand food products are also bought because consumers want to confirm their conscience by purchasing e g fair trade products which among other things are associated with a fair payment of farmers
